### **NEP 2020 Implementation at MGM University**

MGM University has successfully implemented the new National Education Policy with the aim of transforming individuals into 'Global Citizens' in the era of modern technology. The university has set an exemplary standard for other institutions through the implementation of this new educational policy. In line with our objective, we have wholeheartedly embraced this policy to bring about significant changes in the Indian education sector and provide world-class education.

MGMU introduced the new National Education Policy 2020 with the objective of empowering students with the necessary skills and knowledge to establish supremacy in the field of knowledge. MGMU integrates a comprehensive and multidisciplinary approach, with the aim of developing the holistic and ethical growth of human capabilities. MGM University has fully implemented this policy, and special preparations were made for its implementation within the university. Under this policy, a one-year diploma program, a two-year master's program, a three-year bachelor's degree, a four-year bachelor's degree, and postgraduate programs offering multiple entry and exit options have been made available.

The university offers students the freedom to select major and minor subjects based on the programs offered in seven faculty of University. Additionally, students now have the option to pursue two degrees simultaneously, as this facility has been made available to them. Furthermore, while learning, students have the freedom to choose the language of instruction, and through this policy, it will help in the preservation and development of all Indian languages.

During the implementation of the new education policy in the university, approval from the Statutory bodies, Board of Studies (BoS), Academic Council, Board of Management, and Governing Body was acquired after thorough discussions. Having a centralized timetable becomes essential during the implementation of the educational policy in the university. Additionally, it has been emphasized to keep students' interests in mind and ensure that they continue their studies in their respective major subjects while pursuing studies in other branches. To achieve this, a single timetable has been prepared at the university level.

Additionally, while studying, they will have the flexibility to choose from various modes of learning such as online courses from NPTEL/SWAYAM platform providing them with convenience and accessibility.

The university has undertaken special preparations in reference to the important components of the curriculum under the implementation of the new education policy. The university has fully prepared for aspects such as Major Mandatory courses, Major Elective courses, Multidisciplinary Minor courses, Open electives, Vocational skill courses, Skill Enhancement courses, Ability Enhancement courses, Indian Knowledge system, Value Education courses, On Job Training/Internship, Field projects, Community engagement and service, Co-curricular courses, Research methodology, Research projects.
